

## E4E-Education for Employment

### Overview:

PSU Education for Employment (E4E) is a program that aims at improving the qualifications and specific most up to date certifications in CCIS filed to the young qualified CCIS graduates from all over universities who are struggling in seeking for employment. It aims at raising the level of vocational training so as to fulfill the requirements of the labor market. That's why it's called Educational for Employment. CSCEC this year and last year worked hand in hand successfully with SITE to implement the two parts of both Education and guarantee the Employment as well which is a huge successful step over all E4E passed batches in which ALL of the trainees have got their jobs today at SITE after passing all the required certifications.

### The program consists of Two Stages:

#### - Stage I: 3 weeks

Used to be 3 months taught by PSU faculty members as well as some instructors from external institutions. As an improvement and based on the feedback from previous E4E graduates, CSCEC in collaboration with SITE have reduced the Preparation Stage to be 3 weeks in order to make the preparation interpersonal skills stage more effective. The main objective of this course is to enable students to communicate more effectively in meaningful ways within a variety of work settings for immediate use in their workplace.

save the energy of the trainees for the technical stage. Furthermore, the preparation stage this year includes several courses which will refresh their minds to the next stage and relate to their career more than before. We have added Python Programming Course, Cisco, managing the PMP course to be more attractive by scheduling it as two-three hours a day rather than a whole day, re-establishing and re-forming of the English courses to be more attractive and combine them with the Softskills to be more effective to the trainees. As noticed, these improvements have made a huge difference to the effectiveness of the program in this stage. By this improvement, the program meet its aims and helps trainees develop:

- A thorough understanding of English in the business world
- A working knowledge of skills, tasks and strategies related to the world of employment.

– **Stage II: 6 months**

Includes 5 specific tracks in CSIS which requires certain specific certifications. The second stage courses of E4E program provided directly by expert instructors from technical academies in a dedication way of theoretical and practical ways in order to reach the main social responsibility goals behind the E4E program is finding suitable jobs to the qualified E4E graduates in companies and organizations who are looking for Saudi graduates with technical background to fulfill the vision of 2030 such as SITE which has been established by a royal decree order and has 600 employees and will reach up to 6000 Saudi employees within two years in sha Allah. This vision of SITE helps the program's promises to the candidates to be more real and effective directly since the first day of joining the program. In this second stage, PSU and SITE work together to provide International trainers from several certified vendors in the fields of: DIFR, SOC Operations, SOC Platform, Cybersecurity Engineering, PTVA, and GRC to meet the needs of the opportunities at SITE as it is the main aim of E4E Program. Several meetings have been held with SITE to review and edit on designing the schedule for each track based on the feedback of the previous successful graduates who were invited to the meeting. They were two from male batch and one from the female batch.

**Program Selection Criteria:**

- Saudi Nationality.
- Bachelor degree in CIS.
- Not employed and committed to the program.
- Passing an English required Exam.
- Passing a Technical Required Exam.
- Passing the Interview.

Duration:	<p>Preparation Stage: January 5<sup>th</sup> 2019 to January 23<sup>rd</sup></p> <p>Technical Stage: Starting from January 26<sup>th</sup> to June 30<sup>th</sup> and each track has its own duration as following:</p> <ul style="list-style-type: none"> <li>● DIFR: 184 days</li> <li>● SOC Operations: 187 days</li> </ul>
-----------	---

	<ul style="list-style-type: none"> <li>• SOC Platform and Cybersecurity Engineering: 180 days</li> <li>• PTVA: 166 days</li> <li>• GRC: 155 days</li> </ul>				
Time & Duration: Technical Stage	<p>The trainees were divided into five classes of mix male and female upon their career track which will they handle at SITE as following tracks:</p> <ul style="list-style-type: none"> <li>➤ Track 1: DIFR</li> <li>➤ Track 2: PTVA</li> <li>➤ Track 3: SOC Platform and Engineering</li> <li>➤ Track 4: SOC Operations</li> <li>➤ Track: GRC</li> </ul>				
Number of Trainees:	74
